**DETAILED ACTION*****Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 2 are rejected under 35 USC 102(e) as being anticipated by Schlack et al. (7,260,823).

Schlack discloses a method and system for generating information representative of the viewer's viewing behavior based on the interactivity of the viewer (click-streams) with a receiving station (STB) via a control unit (remote control). (Column 6, Lines 11-35)

Schlack discloses, "Sessions (or session durations) may be defined by, for example, the cycling of power (on/off) of the set-top box, a specific window of time or day-part, periods of inactivity, and monitoring channel change, viewing and other viewer activity" (Column 6, Lines 60-64). Schlack goes on to "illustrate how viewing sessions can be defined based on viewer activity or inactivity, and how session start and end points can be based on remote control activity or inactivity" (Column 25 Line 9 - Column 26 Line 48, Figures 28 A-C & Figure 29).

The information disclosed by Schlack encompasses all parsing principles disclosed by the applicant.

Schlack discloses that targeted content (viewing recommendations) is sent to subscribers based on their "signature profiles" (information representative of the viewer's viewing behavior). (Column 36, lines 51-55).
